

# TURYAMUREEBA AMON M

FOUNDER HYDROPONIC FARMS UGANDA  
WAZIHUB INNOVATION COMPETITION WINNER 2021

# BIOGRAPHY

Amon is the Founder of Hydroponic Farms , a Ugandan company that deals in smart farming through the use of artificial intelligence and IoT (Internet of Things ) technology. His company was born out of a need to empower urban farmers to grow their own food in their urban limited space.

Amon's Love for technology and inventing urban favoring Innovations has not gone unseen by both National and International players . In 2020 Amon was named as one of the Most inspiring Digital innovators by Partos. Amon was a finalist in Agrifood Summit Spain in 2020. He is also a 2020 Savvy Fellow, Queens university Entrepreneur Alumni and holds an MBA (Management).

In 2021, SDG Africa identified and named him and Hydroponic farms as finalists for SDG Impact Accelerator. He has also been identified by WAZIHUB and European Union who have recognized Amon's innovative work by awarding Hydroponic farms as the Winner IOT innovations Uganda 2021.
